

## What's in YOUR Hand Sanitizer? Have the facts straight!

Many companies are pushing Hand Sanitizer products which are toxic for your hands and your employees.

Carcinogenic and harmful toxins like benzene, acetylaldehyde, heavy metals, methanol and aromatics are found in lower purity Industrial Grade Ethanol and Technical Grade Isopropyl Alcohol and get absorbed through your hands & skin.

**Guarantee your safety with CERTIFIED ingredients.**

Germs Away is a USP CERTIFIED HAND SANITIZER

- Made with 70% PURE Alcohol and 30% Certified Distilled Water.
- DOES NOT CONTAIN TOXINS.
- DON'T WAIT for your employees to sue you over dangerous products.
- BE PROACTIVE, ask for a legal document of compliance for the alcohol and water used in your hand sanitizer.
